

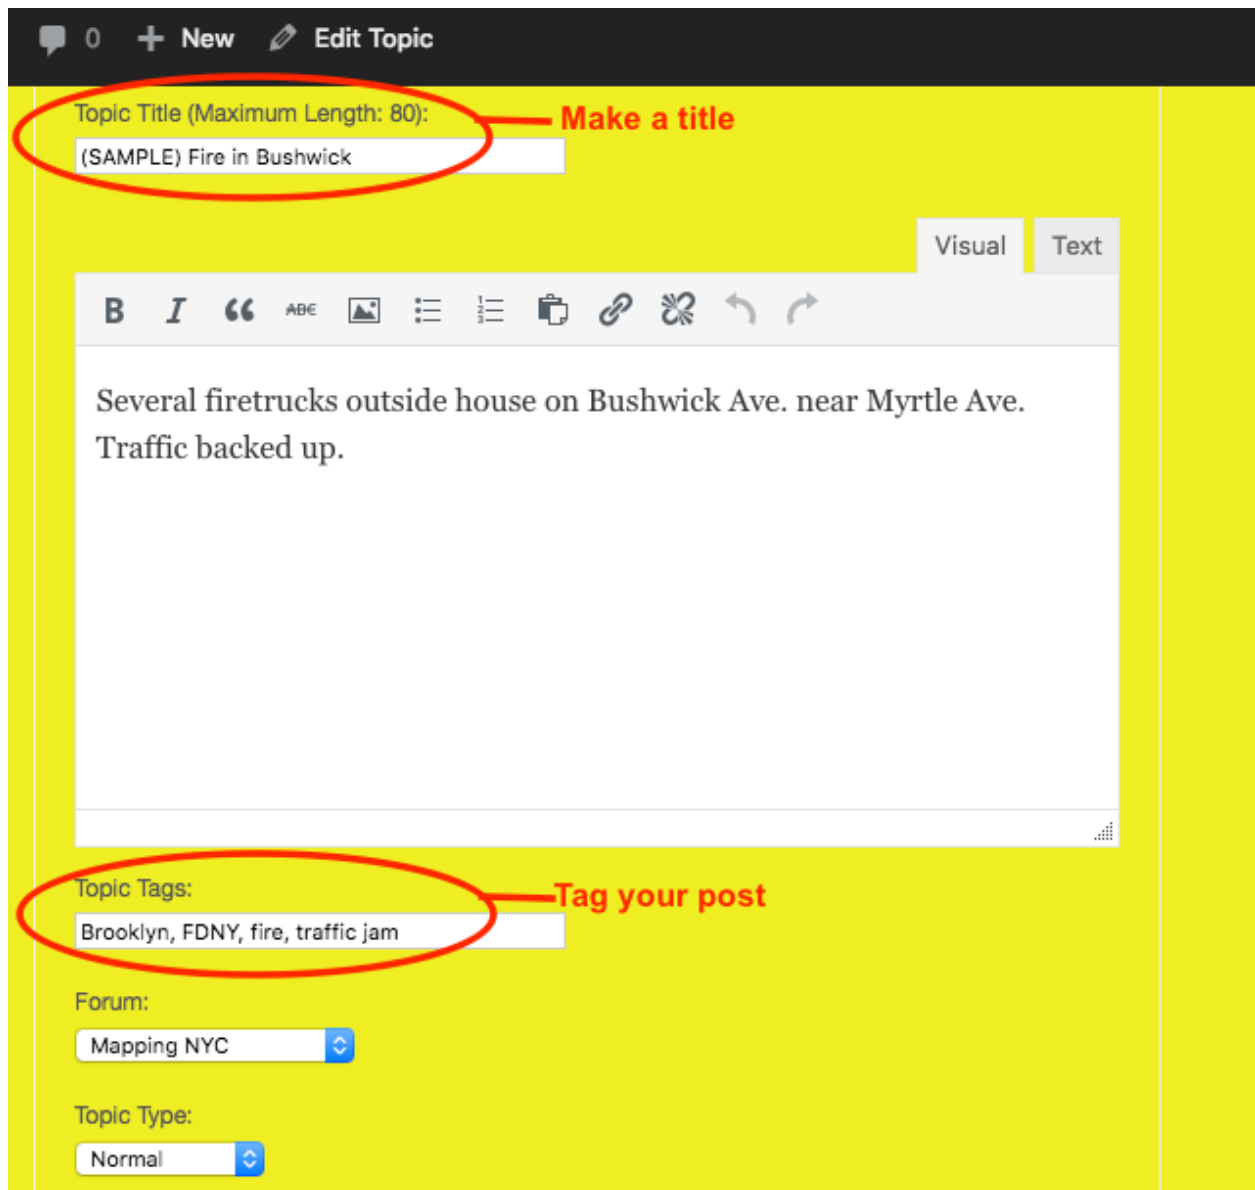

## MAPPING NYC ACTIVITY

### Instructions:

Using the Mapping NYC section of the class website you are required to report at least three “geographic events” in New York City. This will be a semester-long dynamic assignment, where you are asked to spatially tag events you encounter in your daily urban lives. For example, a train delay could merit a post tagged “MTA,” “delay,” “Bronx.” A protest, movie shoot, traffic incident, construction, or Dunkin Donuts promotion could all be tagged accordingly.

Here is an example of how to make a post:

The screenshot shows a forum post creation form with a yellow background. At the top, there is a dark header with a speech bubble icon, a '0' notification count, and buttons for '+ New' and 'Edit Topic'. Below the header, the 'Topic Title (Maximum Length: 80):' field is circled in red and labeled 'Make a title' with a red arrow. The text '(SAMPLE) Fire in Bushwick' is entered in this field. Below the title field, there are two tabs: 'Visual' and 'Text'. The 'Text' tab is active, showing a rich text editor toolbar with icons for bold (B), italic (I), quote (‘‘), text color (ABC), image, bulleted list, numbered list, link, unlink, undo, and redo. The text area contains the text: 'Several firetrucks outside house on Bushwick Ave. near Myrtle Ave. Traffic backed up.' Below the text area, the 'Topic Tags:' field is circled in red and labeled 'Tag your post' with a red arrow. The text 'Brooklyn, FDNY, fire, traffic jam' is entered in this field. Below the tags field, there is a 'Forum:' dropdown menu with 'Mapping NYC' selected. At the bottom, there is a 'Topic Type:' dropdown menu with 'Normal' selected.

Here is what the finished post will look like:

0 + New Edit Topic

## (SAMPLE) FIRE IN BUSHWICK
